## Agile Handover and Automation Solutions

### Transforming handovers for Operations

Our innovative solution efficiently processes historical facility information and documents, as well as new project handovers to ensure facility management can find what they need when they need it. We provide an affordable solution to define and manage the project handover process and normalize O&M data and document repositories.

- Analyze handover integrity for consistency and completeness.
- Manage the facility knowledge change lifecycle.
- Maintain O&M Data integrity, accessibility, and connectivity.

Our patent-pending **Digital Handover Management™ Platform** optimizes the handover of information and documents from infrastructure and facility projects to O&M.

Our solution harvests information from a wide variety of sources: CAD, BIM, XLS, PDF, databases | Organizes the information based on the needs of Facility Management | Normalizes the information to align with O&M Requirements, allows for the distribution of the data to BIM or O/M Systems, and optimizes communication between O&M Silo's.

**Powered by our Digital Handover Management™ Platform, we utilize the latest technology innovations to enable a simple configuration process and a rapid return on investment.**

**Prepares an asset-centric view from your file-centric deliverables.**

- Harvest and standardize hard to get infrastructure information
- Increase the accuracy and trust of facility data
- Share Data and Documents between O&M Silos
