

# Digital Handover Management™

**Solve the continuous handover and integration problem of O&M information silos!**

The Digital Handover Management™ platform transforms incoming information into knowledge, aligning data strategy with O&M business goals. It automates the process of integrating infrastructure handovers into operations, enabling collaborative handover between O&M Information Silos, standardizing Data and Document sharing between existing solutions.

Utilize our iterative process to extract knowledge from data/docs to build object relationships, categorize the data/docs with our engineering library, and utilize the cleansed knowledge to expand the value of O&M Data Silos and increase productivity with our guaranteed ROI.

**Digital Handover Management™ Platform increases the quality of data:**

- Analyze handover for consistency and completeness
- Manage the continuous knowledge change lifecycle
- Maintain O&M Data integrity, accessibility, and connectivity

## Product Specification and Features

### Digital Handover Management™

- Metadata extraction tools from docs, data, and models
- Discover document duplicates and revisions
- PDF handover manipulation
- Automatically migrate and load to any data or document system

### Knowledge Portal

- Unlimited user access
- Google Like search connects O&M Silos
- Opens file directly from the O&M System with the native app
- Locate by: Facility, Location, System, Equipment
